

WWT Consumer and Family Member Employment Development Assessment Tool

INTRODUCTION:

The purposeful employment of individuals with lived experience into the public mental health system, as outlined by the MHSA, is intended to integrate value of the lived experience perspective into the public mental health system. In this way, lived experience could be viewed in the same light as work experience or even education. In an effort to assist counties in establishing successful consumer/family member employment programs Working Well Together has designed this assessment tool as a means of identifying the level of preparedness a county possesses to successfully engage in hiring and retaining individuals with lived experience in their workforce. This assessment is a compilation of data derived from the 2008 CA Consumer Employment Summit as well as input directly from consumers, family members, and professionals.

DIRECTIONS:

Review each statement and determine what stage your county is at. If you feel that a particular statement does not apply to your county simply leave that area blank or put N/A next to the statement. Upon completion, you may use this as an internal tool for your county or email to WWT to request technical assistance from your Coordinator.

Planning and Preparing for Consumer/Family Member Employment

System Wide Checks and Adjustments	Identified	Planning	Implemented
Ensure policies and procedures are within the law and follow best practices			
Provide training to managers and supervisors in ADA and accommodations			
Include contracted agencies in trainings and policy adjustments
